

# 15<sup>th</sup> Meeting of the Central European Tectonic Studies Group (CETeG)

22<sup>th</sup> Meeting of the Czech tectonic  
Studies Group (ČTS)  
HUNTEK-2017

Zánka, Lake Balaton  
(Western Hungary, Transdanubian Range, Badacsony wine region)  
**5-8<sup>th</sup> April 2017**

**Topics of the Meeting:** all disciplines of geoscience are highly welcome having implications on the **tectonic** evolution of the **Alpine-Carpathian-Pannonian-Dinaridic system**

Young scientists (**MSc, PhD**) are particularly welcome;  
the best poster and talk of young scientists will be **awarded**

## Preliminary program

**April 5th - Pre-conference field trip** “Mesozoic structural evolution of the southern Transdanubian Range, an element connecting the Alps and the Pannonian Basin”.

The excursion will start and end in Zánka.

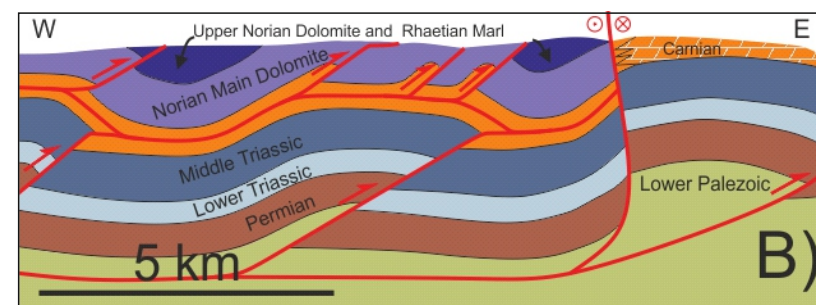

Evening: Welcome party

**April 6th - Oral and poster scientific sessions**

**April 7th - Oral and poster scientific sessions**

Evening: Conference dinner and evening party

**April 8th - Post-conference ‘field trip’** “Snapshots from the metamorphic structural units beneath the Great Hungarian Plains”. We plan to make a highly unusual ‘excursion’ with cores and thin sections derived from boreholes in the Great Hungarian Plain

**Registration and abstract submission: 15th February 2017**
